Opening doors to educate our youth

The goal of the Jacksonville Police Department Junior Citizens Police Academy is that educated youth will be more supportive of police officers and the department. In turn they can become more productive within their own neighborhoods and communities. The Junior Citizens Police Academy is not a "training" class but an exciting "information" class, a behind the scenes look at the Jacksonville Police Department.

The mission of the Junior Citizens Police Academy is to increase youth awareness and confidence, improve youth relations and create a better understanding between the youth and the Jacksonville Police Department through education and having fun while learning.
